

# **The difference between photovoltaic panels and roofs**

## Overview

---

Solar energy and home solar panel systems are becoming increasingly more affordable, which means potential buyers have a lot of questions. If you're considering a traditional solar panel setup or a new solar roof, also known as solar shingles, here's how the two compare.

Simply put, the difference between a solar roof and solar panels is the relationship of whole (roof) to part (panel). Solar roofs are constructed with integrated materials that convert sunlight into electrical power, rather than placing panels on top.
