

Three-phase industrial frequency inverter manufacturer

Overview

What is single to three phase frequency inverter?

Single to three phase frequency inverter is a motor control with single phase input and three phase output, which is mainly used for speed control of 3 phase AC induction motor on 1 phase power supply. Frequency inverter, as known as variable frequency drive (short for VFD), has lots of functions and operation ability.

What is a 15kW 3 phase solar inverter?

. 15kW three phase on-grid solar inverter is specially developed for residential users by INVT Solar to provide full energy for home. Efficient Higher Revenue 2MPP Trackers, high single . - Work well with PMSM,AM and other pumps. - Book design saves installation space.

What are industrial inverters?

Industrial inverters are electrical power converters that change direct current (DC) to alternating current (AC). They are designed for industrial use to safeguard critical loads in places of high power shortage, such as high-rise buildings, offices, and industrial power plants. EnerTech delivers the finest industrial inverters that are efficient in saving energy bills even in the most extreme climatic conditions.

What type of inverter is suitable for 400Hz servo systems?

The inverters are suitable for industrial applications where a low power, three phase AC voltage solution is required, including for 400Hz servo systems to . The CTP 3K Series of inverter systems uses field-proven, microprocessor controlled technology to deliver 3- Phase 3kVA continuous output power with pure sine wave output voltage.

What is a 345 mm inverter?

This rugged industrial quality DC - AC inverter uses field-proven,

microprocessor controlled high frequency PWM technology to generate the required output power with 3- phase . 345 mm. The inverters are suitable for industrial applications where a low power, three phase AC voltage solution is required, including for 400Hz servo systems to .

What is a PFC inverter?

A PFC (Power Factor Correction) inverter is an industrial inverter with a high current handling capacity and pure sine wave output. It is fitted with a single card-controlled system and an IGBT-based design. The PFC inverter saves 50% of the electricity and has an eight to ten hours battery backup.
