

Tunisia solar photovoltaic panel subsidies

Overview

The Tunisian authorities have provided \$121 million for solar thermal and PV systems. The subsidies can cover up to 30% of initial investments in residential PV installations. The Tunisian government said that it has renewed the financing mechanism for its two national residential solar programs. How much money does Tunisian government provide for solar?

The Tunisian authorities have provided \$121 million for solar thermal and PV systems. The subsidies can cover up to 30% of initial investments in residential PV installations. The Tunisian government said that it has renewed the financing mechanism for its two national residential solar programs.

What is the productivity of photovoltaic systems in Tunisia?

Given these favourable conditions, the productivity of photovoltaic systems in Tunisia is very high. According to the International Renewable Energy Agency's (IRENA) Global Atlas, annual electricity production from PV systems ranges from 1,450 kWh per kilowatt peak (kWp) in the northwest to 1,830 kWh/kWp in the extreme southeast.

Is Tunisia a good place to invest in solar energy?

Tunisia's climate presents a key solar energy opportunity and, together with an improved investment framework and a highly skilled workforce, the country should be well positioned support its ambitious Plan Solaire Tunisien. However, to date, Tunisia has fallen short of its intermediate solar PV targets.

How is Tunisia accelerating its energy transition?

Tunisia is accelerating its energy transition by awarding 4 solar photovoltaic projects totaling 498 MW to reduce import dependency and promote renewable energy. Faced with growing energy dependency, Tunisia is taking a decisive step forward in its commitment to renewable energy.

Can Tunisia unlock its solar potential?

However, to date, Tunisia has fallen short of its intermediate solar PV targets. While setting out key information for potential investors in Tunisian solar, the report offers a number of policy recommendations to unlock Tunisia's solar potential, including:.

How much solar radiation does Tunisia have?

Solar radiation varies from 1,800 kilowatt hours (kWh)/m²/year in the north to 2,600 kWh/m²/year in the south. The average total horizontal irradiation ranges from 4.2 kWh/m²/day in the northwest of Tunisia to 5.8 kWh/m²/day in the extreme south. Given these favourable conditions, the productivity of photovoltaic systems in Tunisia is very high.
