

US Solar Energy Storage Battery Prices

Overview

Thinking about adding a battery to your solar panel system?

Learn what you can expect to pay and find out if the benefits outweigh the cost.

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+.

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. That's one reason why the majority of residential solar panel systems in the.

Solar batteries have become increasingly popular. However, it can be hard to know if a solar battery is right for you, so we put together some guidelines to help you know where you stand. Solar storage may be worth it for you if: 1. You have high electricity costs.

If you're planning to purchase one or more solar batteries, there are a few ways to save money on your purchase further down the road.

The cost of a solar battery storage system typically ranges from \$5,000 to \$15,000, including installation. Prices depend on the brand and battery capacity. For example, a 12.5 kWh battery costs about \$13,000 after a 30% tax credit.Is solar battery storage worth the cost in 2025?

Whether solar battery storage is worth the cost in 2025 is totally up to you and your energy goals. If you experience frequent or long-lasting power outages, then having battery storage for backup power can be a gamechanger in keeping you safe, productive, and comfortable (not to mention keeping your food from spoiling!).

How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively

expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

Are solar batteries worth it?

Solar batteries are expensive, but financial incentives are available to lower the cost. Prices often depend on the battery's storage capacity, expected life span, brand and other factors. Homeowners often find that solar batteries are worth it for energy security — even if they're not worth it financially.

How much does a battery cost on EnergySage?

On EnergySage, Pytes USA Energy offers some of the most affordable batteries at about \$651/kWh. You'll typically pay the most for Enphase batteries, which cost about \$1,510/kWh. *The average price per kWh of the 10 most quoted batteries on EnergySage in the first half of 2025 (excluding Panasonic, which is closing its solar and storage business).

How much does it cost to install a solar battery in 2025?

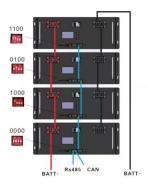

The average cost to install a solar battery in 2025 is between \$9,000 and \$19,000, with the average homeowner paying around \$13,000 on average.

Is solar battery storage a good investment?

Battery storage can be a good financial investment to lower long-term electricity costs at home with greater control over your solar energy use and savings. Storage also provides increased energy security and further carbon emission reduction potential. Are solar batteries safe?
