

What does it take to pack lithium batteries

Overview

What does it mean if a lithium ion battery is packed with equipment?

When a lithium ion battery is shipped with equipment, it means the batteries are being transported within the same package as the equipment they will be used with. Lithium batteries packed with equipment is different from lithium batteries contained in equipment, where the batteries are already installed in the device they are designed for. Other shipping requirements for lithium ion batteries include:

Can I pack a Spare lithium battery?

Take spare lithium batteries that are for personal use only. It is prohibited to pack spare lithium batteries that are for sale or distribution. Try to pack just the number of spare batteries you think you will actually use.

Why is packaging a lithium battery important?

Proper packaging of lithium batteries is essential for their transportation. These batteries hold a charge that can cause them to short circuit, overheat, or catch fire if handled incorrectly. Having the proper packaging prevents accidental activation of these batteries and ensures safety throughout the entire handling and shipping processes.

Can I ship a lithium ion battery?

Regulations differ depending upon what type of lithium battery you are shipping (lithium ion or lithium metal) and whether you are shipping batteries packed with equipment or batteries contained in equipment. Reminder: UPS does not accept Section II shipments of UN3090 or UN3480 in air services.

How do you transport a lithium battery?

Packaging and Labeling Use Approved Packaging: Transport lithium batteries in packaging specifically designed and approved for batteries. This helps prevent physical damage and minimizes the risk of short-circuiting. Insulate

and Protect: Ensure batteries are insulated and protected from physical damage during transit.

How are lithium ion batteries packaged?

Each battery or cell must be entirely enclosed to prevent contact with other equipment or any conductive materials. The inner packaging containing lithium ion batteries can be placed in containers crafted from various materials, including metal, wood, fiberboard, or solid plastic jerrycans.
