

Where are China Communications 5G base stations located

Overview

How many 5G base stations does China have?

For comparison, in November 2021, Xie Cun, director of the Information and Communication Development Department of the Ministry of Industry and Information Technology, said that at present, China has built more than 1.15 million 5G base stations. This accounts for more than 70% of the world's total.

How many 5G networks are there in China?

So far, more than 2,300 5G industry virtual private networks have been built and commercialized in China. As of the end of November 2021, the total number of mobile phone users of the three basic telecommunications companies in China is 1.642 billion. Out of this number, 497 million were connected to 5G mobile terminals.

What is the range of a 5G base station?

5G base stations use millimeter waves that are extremely limited in range. Each 5G base station has a range of between 800–1000 feet, or 0.15–0.19 miles. It makes up for its limited range by surpassing 4G in other key areas: data transfer speeds (bandwidth), latency, and capacity.

How many 5G base stations are there in Hong Kong?

Built over 1,200 5G "golden spectrum" band base stations, covering Hong Kong Island, Kowloon, the New Territories and outlying islands. To date, 3 Hong Kong boasts the highest number of 5G golden spectrum band base stations in Hong Kong.

Where is the first 5G base station made?

Back in July of last year, Verizon received the first U.S. manufactured 5G base station from a facility in Texas. Pictured is Verizon's CTO Kyle Malady holding some of the hardware. Image used courtesy of Ericsson.

Where can I get 5G in China?

All three major telecom operators in China have launched the 5G service. These are namely China Mobile, China Telecom, and China Unicom. While you may not have access to the service in rural areas, you should have some good coverage in larger cities like Beijing, Shanghai, and Shenzhen.
