

Where to buy solar power generators

Overview

Where can I buy a solar powered generator?

If you want to generate free electricity and avoid toxic fumes, invest in a solar-powered generator that can be used indoors. At Lowe's, you'll find the generator you need from brands you can trust, like Generac portable generators, Briggs & Stratton generators, Westinghouse generators, WEN generators, YAMAHA POWER PRODUCTS generators and more.

Should you buy a solar generator for your home?

You get free energy from the sun along with a clean and quiet operation with zero emissions. Solar generators also have a longer lifespan than other generators since they have no moving parts. Wondering about the possibility of having a solar generator for homes?

Since power is stored in batteries for later use, it's safe to bring them inside.

Are solar-powered generators worth it?

Solar-powered generators used to be a niche product geared towards off-the-grid living. They still do the job in that scenario, but as the market matures, with an ever-expanding range of sizes and configurations, the quiet, emissions-free generators are becoming an essential source of backup power for all kinds of homeowners.

Are portable solar generators a good choice?

Like other portable generators, two or more solar generators can be joined, or "chained," together to increase storage and add power. Since portable solar generators don't require gas to operate, they're an excellent choice for camping or tailgating, as there's no need to worry about hauling gas cans to and from your activities.

Does Lowes sell solar generators?

Many units can also be charged from alternating current (AC) household current to be ready for future use. Lowe's carries top brands, like NATURE'S GENERATOR, Goal Zero, BLUETTI solar generators and Jackery power stations. Shop Lowe's online or in store to find the best solar generator for your outdoor activities or storm prep.

Should I use a solar generator or a gas generator?

For lower power needs under 3,000 watts, solar generators are ideal, while gas generators work better for larger demands, especially 10,000 watts or more. If automatic backup power is essential, a standby gas generator is reliable and easier to install, although some solar options offer this with more complex setups.
