

# **Which 5G base station in China is the best**

## Overview

---

How many 5G stations are there in China?

Stock photo of a network tower. Base stations offering high-speed fifth-generation (5G) mobile networks have now exceeded 3.19 million, the Ministry of Industry and Information Technology (MIIT) in China has said. The country now hosts 22.6 5G stations for every 10,000 residents, CGTN reported.

How many 5G base stations will China have in 2025?

China's Ministry of Industry and Information Technology (MIIT) unveiled plans to more than triple the number of 5G base stations over the next four years, targeting a total of 3.64 million by end-2025, local newspaper China Daily reported. Under this plan, China aims to have 26 5G base stations for every 10,000 people by the end of 2025.

How many 5G base stations are there in the world?

In addition, a total of 819,000 5G base stations have been built by these three telecom giants, accounting for 70% of the world's total. As China has played a leading role in 5G technology, its 5G development has extraordinary significance for other countries.

Where is 5G used in China?

The official also said that 5G coverage reached 97% of counties and 40% of rural towns across the country. Xie said 5G has already been used in 22 industries, including industrial manufacturing, mining, ports, medical care, education and entertainment.

How many 5G terminals are there in China?

The number of 5G terminal connections in China has exceeded 310 million, accounting for more than 80 percent of the world's total, according to Liu. During the 13th Five-Year Plan period (2016-2020), China built the world's largest optical-fiber and 4G network, with over 99 percent of the villages

across the country connected to both technologies.

Will 5G improve public services?

Official numbers for the US suggest that the US built 100,000 base stations between the years 2019 and 2021 and while Americans are looking at 5G to stream videos better and play games on their increasingly powerful smartphones, China is looking to deploy the technology for improved delivery of public services.
