

Which PV inverter to choose in Chad

Overview

Why did Innovent develop a solar power plant in Chad?

The other advantage would be the preservation of the environment, important in a semi-desert country like Chad. InnoVent has therefore decided to develop the country's first solar power plant, by implanting it in Abéché, the second largest city in Chad with 80,000 inhabitants, but which is not connected to the national electricity grid.

Where is Chad's first solar power plant located?

InnoVent has therefore decided to develop the country's first solar power plant, by implanting it in Abéché, the second largest city in Chad with 80,000 inhabitants, but which is not connected to the national electricity grid. The project's beginnings date back to the end of 2015.

Why is electricity so expensive in Chad?

Despite these resources, electricity remains very scarce in Chad, making it one of the most expensive in the world. Today, apart from the 1 MW wind power plant (composed of 4 wind turbines) in Amdjarass, a town in the east of the country, electricity is only supplied by generators, which regularly break down.

Is Chad a good place to live?

Indeed, Chad enjoys an exceptional sunshine rate of 2,000 to 2,600 hours per year. Some regions also offer very interesting wind speeds. Despite these resources, electricity remains very scarce in Chad, making it one of the most expensive in the world.
