How to choose a power inverter?

Wattage rating: This might be the most important factor when it comes to buying a power inverter. All it takes is some simple math to know if an inverter can handle what you want to plug in. Multiply the voltage (5 volts for USB, 12 volts for cigarette lighter, and 120 volts for an AC) by the amperage of your device to get the wattage.

What is the best power inverter for high-draw devices?

Because of the six plug options and internal protection, this is our pick for the Best Power Inverter for Higher-Draw Devices. If you just need a couple of charging ports, the DeWalt 140W is a great option. The inverter is built with durability in mind, featuring rubber grips and a thick power cord.
