

# Which side of the solar panel is the front

### **Overview**

In solar cells, the front side is commonly recognized as the side that faces the sun, characterized by a layer of transparent material that allows sunlight to penetrate. This side is designed specifically to maximize light absorption and energy conversion.

### Which side of the solar panel is the front

### **Thermal Conductive Back Sheets**

In traditional Solar Panel manufacturing, a PVF/PET/PVF (T/P/T) back sheet is used in layer with an EVA encapsulant for protecting and encapsulating the ...
