

Wholesale of container roof panels in the Republic of South Africa

Overview

What types of panels are available at absolute containers?

At Absolute Containers we offer panels for sale, ranging between various Chromadek, FRP, IBR, Stainless Steel and Aluminium panel manufacturing.

Do East Rand container insulated panels rot?

East Rand Container Insulated Panels do not rot, warp or corrode in damp conditions. This makes them ideally suited for use in cold rooms, freezer rooms and chillers.

What are insulated roof panels?

Increasingly instead of profiled sheets (uninsulated trapezoidal sheets), insulated roof panels are used. These panels consist of an upper and lower sheet, which are usually made of galvanised painted steel. Standard thicknesses tend to be between 0.4mm to 1.0mm, which can produce different strengths as needed.

What are roof panels made of?

The inner surface of these panels is made of stucco embossed aluminium foil. In addition, these roof panels are cheaper than conventional roof panels. Insulation tends to come in both polyurethane and polyisocyanurate (PUR and PIR) as well as rockwool (also known as mineral wool).
